We provide dedicated support for Enterprise Applications on an Annual Basis or on a per Visit basis. Since these are Cloud Based Applications, the support is easy to provide while being anywhere around the Globe.

Software Development

We allow custom module development as per your need. Our ERP developers can develop custom software & plugins, according to our clients needs & objectives.

Training

We immensely educate and enlighten you in implementation of ERP Systems to create a systematic functioning in and around the organization. Our ERP consultants execute hands-on training and run parallel workshops to provide excellence on your path.

OVERVIEW & GOALS

We all know that people are the foundation of any great organization. You wouldn't be where you are today without committed employees and loyal customers. How can you support your staff, retain customers, increase revenue, grow market share, and remain flexible in a changing corporate landscape? Responsive, secure, and advanced IT infrastructure is the best investment you can make - now and for the future.

Keeping up with technological advancements can be overwhelming, and you can't be an expert in everything. You need reliable and trustworthy IT advice, planning, and management services you and your people can depend on. Extension Technologies specialize in:

- Custom IT solutions that build on your current business and IT infrastructure
- High-level security structures that protect you and your customers
- User-focused tools and training that make implementing new systems easy
- Long-term management of IT systems and infrastructure for clients

We focus on your business process automation, so that you can focus on your business growth.

Our experienced consultants work with you to guide your technology strategies, helping you align them with your business and process strategies. We provide strategic, architectural, operational, and implementation planning for all your IT needs.

What is ERPNext?

ERPNext is an open source business system for organizations of any size in various industries. It's good for growing businesses that have limited resources and would benefit from scalability and strong customization.

It has all of the standard capabilities an organization could need, plus more advance capabilities, such as a multilingual website builder that can manage content as well as commerce requirements. With built-in integrations available, users can sync with Googl Slack, PayPal, Shopify and more to fully centralize their business operations.

It can be hosted on their servers or self-hosted by the user. It can deploy in the cloud on-premises. It also has a mobile app, so users can access company data and comple tasks when they're on-the-go.

BENEFITS OF USING
ERPNEXT

- Do a lot more than just accounting! Manage inventory, billing, quotes, leads, payro and a lot more.
- Keep all your data safe and in one place. Don't keep hunting for data when you need it across spreadsheets and different computers. Manage everyone on the same page. All users get the same updated data.
- Stop repetitive work. Don't enter the same information from your word processor to your accounting tool. It's all integrated.

- Keep track. Get the entire history of a customer or a deal in one place.
- Saves money.
- **Easier to configure:** Big ERPs are notoriously hard to setup and will ask you a zillion questions before you can do something meaningful.
- **Easier to use:** Modern web-like user interface will keep your users happy and in familiar territory.
- **Open Source :** This software is always free and you can host it anywhere you like
